

Name _____

FOOD WEB

In the space below, you are going to individually create a realistic food web using at least **10** different organisms that could be found in the ecosystem shown in the picture given to you. First, list the organisms according to their trophic level on the back of this sheet with a partner to help you get started.

- **IDENTIFY** and **DRAW** each organism
- **LABEL** the trophic level to which EACH organism belongs. Within your food web you must have AT LEAST
 - 1 producer
 - 1 primary consumer
 - 1 secondary consumer
 - 1 tertiary consumer
 - 1 detritus feeder/decomposer
- **DRAW ARROWS** to represent the flow of energy in your food web
 - Make sure your arrows are pointing in the correct direction
 - Make sure you create a WEB and not just a chain

Ecosystem Type: _____

List the Producers:

List the Consumers:

Primary consumers:

Secondary consumers:

Tertiary consumers:

List the Detritus Feeders/Decomposers:
